

DIRECTIONS FOR USE:

Distribute this product evenly across the surface of the spa water while the pump is running and the spa is filtering. Apply weekly, after heavy use, or when the water appears slightly hazy or dull. Increase the frequency of application if the spa is used frequently.

1. Turn on the circulation system.
2. Add 2 ounces of non-chlorine shock for every 500 gallons of water, broadcasting the product evenly over the surface of the spa water while the pump is running and the spa is filtering.
3. Continue circulating the water for 15 minutes. The spa may be used 15 minutes after application.

SPALUXE NON-CHLORINE SHOCK

PRECAUTIONARY STATEMENTS:

Caution: Keep away from heat and store away from clothing or combustible materials, taking precautions to prevent mixing with other chemicals. Avoid breathing dust or mist, and wash skin thoroughly after handling. Use only outdoors or in well-ventilated areas, and ensure contaminated work clothing does not leave the workplace. Wear appropriate protective gloves, clothing, eye protection, and face protection, and use respiratory protection if ventilation is inadequate.

FIRST AID:

- **IF INGESTED:** Do not induce vomiting under any circumstances. Never attempt to give anything by mouth to someone who is unconscious. Rinse the mouth with water if the individual is conscious, and consult a physician for further instructions.
- **SKIN CONTACT:** Remove contaminated clothing and shoes as quickly as possible to prevent further exposure. Wash the affected skin thoroughly with soap and plenty of water. Once the area has been cleaned, seek advice from a physician.
- **IF INHALED:** If someone has breathed in the substance, move the person to fresh air immediately. If they are not breathing, provide artificial respiration without delay. After taking these steps, consult a physician promptly for further guidance.
- **IF IN EYES:** Flush the eyes thoroughly with plenty of water for at least 15 minutes. If possible, continue rinsing the eyes while transporting the individual to a hospital. Consult a physician immediately to address any potential damage.

STORAGE AND DISPOSAL:

To ensure safe handling, avoid contact with skin and eyes and minimize the formation of dust and aerosols. Be aware that further processing of solid materials may create combustible dust, so this risk should be considered before proceeding. Provide proper exhaust ventilation in areas where dust is generated, and keep the material away from ignition sources, including heat and open flames—no smoking is allowed. Do not inhale the material or allow it to come into contact with eyes, skin, or clothing. Wash thoroughly after handling, and ensure clothing is cleaned after use. For safe storage, keep the container tightly sealed in a dry, well-ventilated area away from heat sources.
