

Hello!

I wanted to reach out regarding this order.

Your order was routed to our **Berlin, NJ** Location, but unfortunately, we do not have the **Champion Muriatic Acid** at this location, it had recently sold out.

Normally, we would have no problem sending it out from one of our other locations. However, because this item is regulated / hazmat, it would take a good bit of time to get delivered to you from our **CO** location, where it *is* in stock.

As an alternative, we wanted to send an identical product, from **Buckman's**. This product is actually more expensive, but it would be delivered to you much quicker since it would be shipping from our NJ location. It is the same, commercial grade, 20 Baume Hydrochloric (Muriatic) Acid.

We hope that this doesn't come as an inconvenience, but please, if you have any questions please do not hesitate to message us on Amazon, or reach out to us at sales@ezpools.com!

Best,

Rich
