

**45 LB**  
BUCKET WITH SCOOP

# PREMIUM AQUARIUM SALT

## FOR REEF AQUARIUMS

- ✓ For The Demanding Coral Enthusiasts
- ✓ Backed By Marine Experts
- ✓ Rapid Dissolving Formula

**150 GALLON  
45 POUNDS**

### DIRECTIONS FOR USE:

1. Determine the current salt level with a hydrometer.
2. Add 1.5lbs (.25 Cups) per 5 Gallon bucket to achieve the ideal salt range.  
The ideal range is 1.025 specific gravity, measured on a refractometer.
3. Dissolve Premium Aquarium Salt in a small container before adding it to your fish tank to prevent undissolved granules from harming fish.
4. Experts recommend Aerating the water before adding the salt, as it can temporarily reduce oxygen levels in the water. Not required.

PACKAGED BY:  
TRADE GRADE LLC.  
301 PINEDGE DRIVE,  
WEST BERLIN, NJ 08091

### CONSUMPTION:

TradeGrade Aquarium Salt is not meant for human consumption. Keep out of reach of children. Contact in dry form may cause skin or eye irritation. In the event of contact, completely flush skin or eye(s) with cool water and seek medical attention.
